

ThinkPad X1 Carbon (2nd Gen) Battery Replacement

Written By: Ryan

Step 1 — Cover

- Remove the 7 philips head screws from the back.
- Lift off back cover.

Step 2 — Battery Disconnection

- Using a plastic pry tool disconnect the battery from the motherboard.

Step 3 — Battery Removal

- Remove the five black phillips screws from the battery.
- The battery can now be removed from the laptop.
- ⓘ There is one in each corner and the center.

To reassemble your device, follow these instructions in reverse order.
